

ILUMAG[®] splash

elegant, weatherproof lighting system
for changeable motifs

**„And you see the ones in brightness, those from darkness drop
from sight!“**

Bertold Brecht

Use ILUMAG splash in the following applications:

outdoor advertising | communication and information on outdoor facades and pillars |
wet room design (sauna, bath, etc.)

The wide range of possible applications results mainly from:

- stable, weatherproof design
- great expansive effect in the dark
- low construction depth, low weight per unit area
- homogenous surface illumination
- energy-efficient LED technology with low voltage
- easy assembly due to screw connectors
- changeable backlits for different motives

PRODUCT-DETAILS

- flat (23 mm) aluminium profile frame with LED panel (approx. 25 kg/m²)
- illuminated areas up to max. 1.20 x 2.50 m (freely selectable)
- any motif as print (min. 100 dpi) on backlit foil
- if necessary, easy change of motif due to pressure-sensitive adhesive surface
- energy-efficient 12/24 V LED technology \cong 14 W/m (reference length batten luminaire)
- service life: > 50,000 h
- colour temperature: approx. 5000/7500 K

Creative freedom in a tough environment!

Set accents in the dark with ILUMAG splash.

With its freely designable surfaces and exchangeable backlits, the weatherproof system offers optimum conditions for outdoor use.

But also in humid indoor environments, e.g. as shower backlits, they impress with brilliant, large-format images and bring life into rooms.
