

ILUMAG[®] perm

ultra-flat LED area light for various applications in the presentation area

The super slim area light for luminous impressions!

Use our frameless ILUMAG perm to realize your lighting concepts and presentations even under special conditions:

interior architecture | interior design | visual communication | image transfer |
museum and exhibition construction | store fitting | point of sale

The wide range of possible applications is mainly due to:

- very low building depth
- very low weight per unit area
- homogeneous surface illumination
- frameless, permanent motif of choice
- energy-efficient LED technology
- almost invisible power supply due to special flat cable
- flexible production according to customer requirements

PRODUCT-DETAILS

- ultra-flat (5 mm) and lightweight LED panel (8 kg/m²)
- illuminated surfaces in any size up to max. 1,20 x 2,48 m (on request also larger in panels)
- any motif as print (min. 100 dpi) on backlit foil
- one or two LED strips as required
- energy-efficient 12/24 V LED technology \cong 14/16 W/m (reference length light strip)
- service life: > 50,000 h
- color temperature: approx. 3500/5000/7500 K
- luminous flux: approx. 80 lm/W
- optional accessories: 12/24 V power supply, remote control with dimmer, flat cable in white or silver

Simply clever!

Why go above and beyond when simple is really good? If you're looking for a solid, affordable solution for illuminated images that won't need changing, ILUMAG perm offers just that.

Expressive images with pleasant, even backlighting create flair in your rooms or support you in your commercial tasks - always space-saving and individual.
