

## ILUMAG<sup>®</sup> window

ultra-flat LED light panel  
for changeable motifs on  
glass surface

### Show presence in the dark!

Use our ILUMAG window in the following areas:

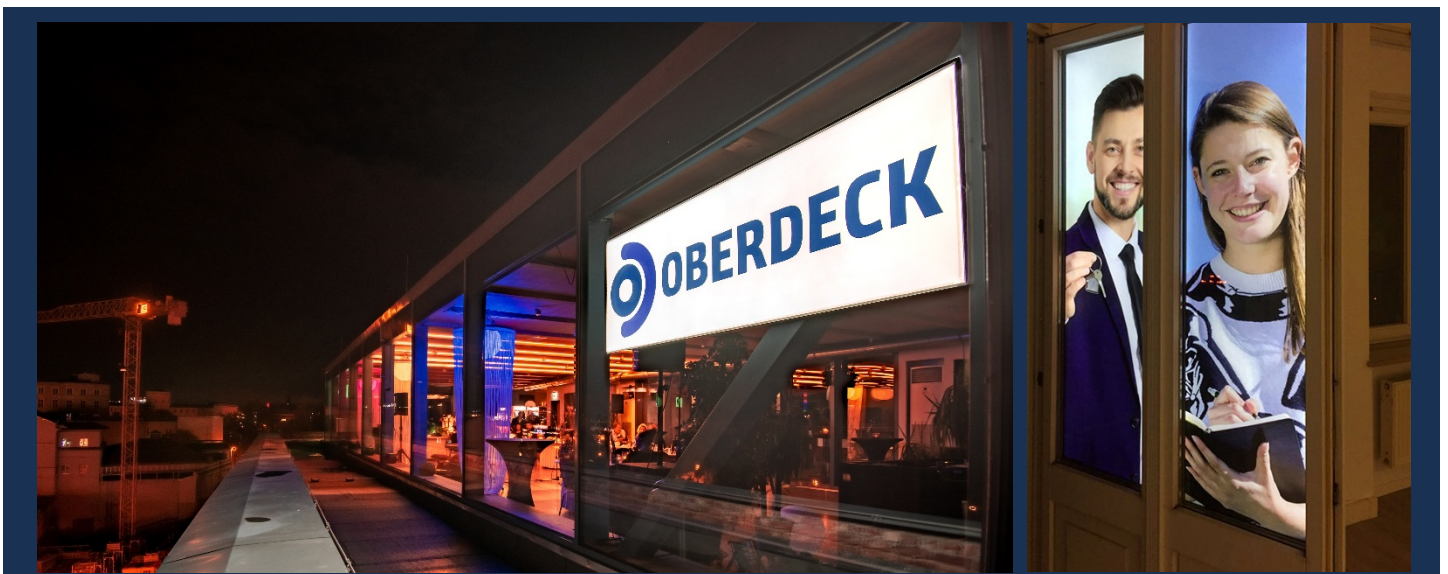

illuminated advertising, also for listed facades | interior design | shop fitting |  
shop window fitting | museum and exhibition construction

The wide range of possible applications is mainly due:

- very low installation depth, very low weight per unit area
- homogeneous area illumination
- energy-efficient LED technology
- almost invisible power supply due to specially developed flat cable
- easy mounting by adhesive or velcro tape on glass surface
- flexible production according to customer requirements
- exchangeable backlits, on request with different motifs on the front and back side

# PRODUCT-DETAILS

- ultra-flat (4 mm) and lightweight LED panel (approx. 6 kg/m<sup>2</sup>)
- illuminated surfaces in any size up to max. 1.20 x 2.50 m (on request also larger in panels)
- optional one-sided or double-sided illumination
- any motif as print (min. 100 dpi) on backlit foil
- mounting with self-adhesive Velcro on window or door glass
- energy-efficient 12/24 V LED technology  $\cong$  14/16 W/m (reference length of light strip)
- service life: > 50,000 h
- color temperature: approx. 3500/5000/7500 K
- luminous flux: approx. 80 lm/W
- optional accessories: 12/24 V power supply, remote control with dimmer, flat cable in white or silver

## New thought!

You want an illuminated outdoor advertising, but your facade is listed or a substructure is not possible?

This is exactly where ILUMAG window is the ultimate solution! Mounted from the inside to the window pane, it provides an outstanding outdoor effect without weathering, additional costs or permits. Exceptional is also the ability to illuminate outside and at the same time inside with changeable motifs if necessary.
